Course Outline

Course: Phys 214 General Physics II- Section 3
Instructor: Dr Alakabha Datta
Office: 121-B Lewis Hall
Meeting: M-W-F 12-12.50 pm at Lewis 101
Office Hours: M-W 11am-11.50 am or by appointment.
Email:datta@olemiss.edu, datta@phy.olemiss.edu
Phone: (662) 915-5611
Course Information: Check Blackboard.

NOTE: You should take the Lab Phys 224 along with this course if you have not passed it already.

Giancoli
University of California, Berkeley
Course Goals and Learning Outcome: After completing the course you will know the basic laws of physics and its application to various sciences, especially life sciences and to everyday life. You will also learn to analyze problems logically and systematically. This is the second part of the General Physics program— the first part having being covered in Physics 213. In the second part we will mainly discuss electromagnetic phenomena including waves, optics and certain aspects of modern physics.

Marking:

Homework: 30%

Homework: I will assign weekly homework that has to be turned in one week. No late homework will be accepted after the due date. Please write your name in block letters and include the problem set number with your homework. You can get help to do your homework (including help from the internet) but turn in your own work. Do not copy from someone. You are not authorized to use the Instructor’s Solution Manual. There is a tutoring room available for help with your homework.

Homework solutions will be emailed to all students and will be posted on Blackboard.

Tests: 45%

There will be 3 tests each worth 15% and will roughly given at intervals of a month. Each test will cover one class period (50 mins). The dates will be announced later but you will be notified in advance of the test date and the topics included in the test. One of the tests will be given and graded before the last day to drop the course.

Final Exam: 25%

The final exam will be based on chapters covered after the last test though you will be required to use material and concepts covered in earlier chapters not included in the final exam. The exam will be at most 2 hours.
Time of Final Exam: Thursday May 8, 2008 at noon  (See Class Schedule)

An overall course average of the following percentages will guarantee the corresponding letter grade:

90%  A
80%  B
70%  C
60%  D

Topics Covered in course: Topics will be taken from the following chapter. Click on the chapter link to access useful information.

Chapter 15: The Laws of Thermodynamics
Chapter 16: Electric Charge and Electric Field
Chapter 17: Electric Potential and Electric Energy; Capacitance
Chapter 18: Electric Currents
Chapter 19: DC Circuits
Chapter 20: Magnetism
Chapter 21: Electromagnetic Induction and Faraday’s Law; AC Circuits
Chapter 22: Electromagnetic Waves
Chapter 23: Light: Geometric Optics
Chapter 24: The Wave Nature of Light
Chapter 25: Optical Instruments
Chapter 26: Special Theory of Relativity
Chapter 27: Early Quantum Theory and Models of the Atom
Chapter 28: Quantum Mechanics of Atoms
Chapter 32: Elementary Particles

Attendance: There is no attendance requirement. However if you miss an exam or cannot turn in HW on time because of illness I will
require a doctor’ note. If you will away on other reasons inform me prior to your absence and get a note if applicable.

_______________________________________________________

Academic Integrity: We will follow the University's policy of academic integrity (M-book). Violations of these policies will result in a failing grade and other disciplinary actions. In particular you are not allowed the use of the Instructor’s Solution Manual.
