Bring a scientific calculator (e.g. Texas Instruments TI-30Xa) to labs/tests.
Please come to the lab night and time you have signed up for. Labs are a
required part of the course. You must do at least 70% of the labs to pass.
Come to labs even if it is raining.   11   11   22
Adding exponents (11+11=22).   10   x   10   = 10
                            stars/galaxy x galaxies = stars in the universe

Reasonable accommodations for students with disabilities will be provided.
Learning Objectives: To learn how stars, galaxies, and other wonders
of the Universe work and to find out how astronomers made these
discoveries and to do some of the actual experiments.
