1. What is the objective of this lab?

2. Explain the relationship $\frac{1}{p} + \frac{1}{q} = \frac{1}{f}$. Be sure and define the terms.

3. What is the definition of a ‘real’ image?

4. What is the definition of a ‘virtual’ image?

5. What three methods will be used to calculate the focal length of a converging lens.

6. What is the advantage of using the ‘conjugate foci’ method?
