

Physics 2111 Syllabus

“Lab Physics for Science & Engineering”

University of Mississippi – Fall 2026 – Section T.B.D.

**Instructor of Record and
Final Arbiter of Grades**

Dr. Bin Xiao
106, Lewis Hall
bxiao@olemiss.edu

Lab Physicist

Mr. Raymond Siedlecki
Room 121A, Lewis Hall
rhsiedle@olemiss.edu
Office Phone: (662)-915-7980

Acting Lab Physicist

Dr. Josh Moore
Room 440, Duff Center
jmoore10@olemiss.edu

Teaching Assistant

Location and Time

Course Description

Lab experiments coordinated with lecture topics in Physics 2110 – General Physics (*Corequisite*)

Course Objectives

Through the collection and analysis of physical data, students will develop both a conceptual and quantitative understanding of physical phenomena. Students will also learn to clearly communicate about experimental processes, results, and uncertainties.

Required Personal Equipment

All students are required to bring writing utensils and a scientific calculator (without internet access) to the lab each session. (The Lab Physicist’s recommended calculator is the Texas Instruments TI-30X IIS (or similar)).

**The main source of information about this course including the lab manual and lab schedule is our course website:
<https://www.phy.olemiss.edu/lab>**

The Weekly Agenda/Grade Architecture

- 1) Prepare yourself prior to your lab section by understanding the advanced reading assigned in the lab manual, reading about the week’s experiment and procedure in the lab manual, and printing and completing day’s prelab (found on the course website).
- 2) Turn in your printed and completed prelab BEFORE the beginning of the weekly quiz. Prelabs are worth **20%** of your final grade. Late prelabs will not be accepted.
- 3) Take (and pass) a 10-minute quiz on the experiment you about to perform. Questions may be drawn from the advanced reading assigned in the lab manual, the prelab assignment, or the lab manual itself. Quizzes are worth **20%** of your final grade. Extra time for the quiz will not be provided for late arrivals (even if the quiz ends early).
- 4) Complete the experiment and corresponding datasheet. Your datasheet will be due at the end of the lab period unless otherwise noted (in writing or TA announcement). Datasheets are worth **60%** of your final grade. Late datasheets may be penalized at the lab physicist’s discretion.

Minimum “Guaranteed” Grades:

A	(percentage $\geq 92\%$)	C+	($77\% \leq \text{percentage} < 80\%$)
A-	($90\% \leq \text{percentage} < 92\%$)	C	($70\% \leq \text{percentage} < 77\%$)
B+	($87\% \leq \text{percentage} < 90\%$)	D	($60\% \leq \text{percentage} < 70\%$)
B	($82\% \leq \text{percentage} < 87\%$)	F	(percentage $< 60\%$)
B-	($80\% \leq \text{percentage} < 82\%$)		

Grade Policies

Any grade dispute must be accompanied by the graded material in question if it has already been returned to the student. Final grades may be adjusted by the instructor of record to account for different grading styles across sections. Students should monitor their grade on *Blackboard* to ensure no “data entry” mistakes are made. Any requests to correct grading mistakes must be brought to the attention of the Lab Physicist *prior* to the start of finals week!

Each student will have their lowest datasheet grade, lowest quiz grade, and lowest prelab grade dropped from their final grade calculation. Final letter grades are at the discretion of the Instructor of Record and may fall outside the “minimum guaranteed” ranges in special cases (e.g., academic misconduct, poor attendance, extenuating circumstances, etc.).

Attendance Policy

Lab attendance is mandatory to receive a grade; work will not be accepted from any student not physically present during their assigned lab section. A grade of “zero” will be assigned for absences. Changes to a student’s lab section must be approved by the lab physicist and will only be granted for legitimate and necessary reasons.

Accommodations for university-approved absences from lab or absences from lab resulting from a civic, religious, or personal duty should be discussed with the Lab Physicist in advance of the absence. Accommodations for unexpected absences due to illness or other unpreventable personal emergencies must be discussed with the Lab Physicist within *one week* of returning to lab. *Please do not attend lab if you are ill with symptoms of any contagious disease!*

Requests for make-up labs **MUST** be accompanied by a letter or email (including contact information) from an authority figure (e.g., medical doctor, personal lawyer, superior officer, university official, etc.) deeming the absence necessary. In the case of wedding or funeral attendance, a program (or similar proof of attendance) may be requested.

Lab Rules and Policies

- No food is allowed in the lab while lab is in session.
- Drinks must be in a container with a screw-on cap, and may not be kept on or near the lab benches.
- Cell phones may not be out/used at the lab benches.
- Closed-toed shoes should be worn in the lab.
- Bookbags must be stored on the provided shelves.
- Long hair must be tied back while working with the lab equipment. Be conscientious of loose clothing and dangling jewelry.
- Follow all TA instructions concerning procedures and safety for each individual experiment.

University Policies

We will abide by all university policies including (but not limited to) academic integrity (M Book, Section I), disability accommodation (M Book, Section V), nondiscrimination (Ole Miss Policy Number: 10000632), and attendance verification (<http://olemiss.edu/info/gotoclass/>).

Academic Misconduct will not be tolerated. *Plagiarism attempts WILL be treated as a serious violation of academic integrity and will be penalized.* Penalties range from a reduction in the offending student’s grade to complete expulsion from the university. *The use of generative “artificial intelligence” tools (e.g. ChatGPT) to assist with lab work will be considered a violation of the academic integrity policy.*

Students seeking a reasonable accommodation to assist with course requirements in the face of a relevant disability should contact The Office of Student Disability Services (662-915-7128 or sds@olemiss.edu) and notify the instructor at the beginning of the course or as soon as an accommodation is approved.

Intellectual Property

All materials distributed in this course (electronically or in hardcopy) are protected under intellectual copyright. Any attempt to share these materials publicly, by publishing them on the internet or otherwise, or to profit from their use or distribution in any way constitutes theft and will be in violation of intellectual property law and the UM Academic Conduct Code.

Video and/or Audio recording in the lab is forbidden unless explicit consent is given by the Lab Physicist.
